

## ABSTRACT

The present invention is related to a method for transmitting data utilizing a plurality of communication applications simultaneously in a communication device supporting the plurality of communication applications, and a communication device for implementing the method. The method according to the present invention includes establishing a first communication session between a user of the communication device and a recipient via a first communication application supported by the communication device, invoking a second communication application to transmit data to the recipient via the second communication application during a communication session concurrent with the first communication session, and, in response to invoking the second communication application, automatically retrieving communication information related to the recipient and necessary to establish the concurrent communication session via the second communication application.
